Partner with CSCAN in recognizing leaders and visionaries who are being honored for their innovations, services, and dedication to the computing profession. Opportunities for partnership showcase your commitment to those dedicated to advancing computing.

October 22, 2022
Delta Airport Hotel
Toronto, Ontario
The annual CS-Can|Info-Can Awards gala will be held on October 22, 2022, and we need your support to make it the most spectacular event to date! The awards program was implemented in 2014 as a way of recognizing and celebrating excellence in Computer Science. Each year, awards are presented in the following categories:

- Lifetime Achievement Award
- Outstanding Early Career Computer Science Researcher Award
- Distinguished Dissertation Award
- Distinguished Service Award

This year’s gala will be held at the Delta Airport Hotel in Toronto. We are also changing the format to allow for the in-person recognition of the award winners for 2019, 2020, and 2021 to properly honour our over 20+ award recipients. Your support will help to showcase outstanding individuals from Canada’s Computer Science community through a highly-coveted, national award.

For a full list of award winners visit https://cscan-infocan.ca/awards/winners

CS-Can|Info-Can is a national, non-profit organization dedicated to ensuring excellence in research, innovation and education across all aspects of computer science in Canada.

We aim to foster the next generation of computer science researchers and professionals by developing academia/industry interactions that encourage innovation and ethical application of computer technology. CS-Can|Info-Can is the voice of computer science in Canada that actively promotes an inclusive environment to support diversity and participation by under-represented groups.

CS-Can|Info-Can membership includes 60 computer science and affiliated departments in universities across Canada, over 20,000 undergraduate and graduate students, and approximately 1,300 researchers and teaching faculty.
